Skype For Business For Mac 2017

Peer-to-peer desktop sharing from Skype for Business 2016 on Windows client for on-premises Lync Server 2013 users is not supported.. Microsoft Customer Support has officially stated: We cannot provide the exact date when the Skype for Business 2016 MAC client will be released.. I looked it up in the Skype app under Calendar and if you click the JOIN button it works but if you mistakenly see the link in the body of the calendar then you still get the browser.. Microsoft Support officially stated: We arent able to provide the exact date when Skype for Business 2016 Mac Client will be released.. Peer-to-peer desktop sharing from Skype for Business 2016 on Windows Client for Lync Server 2013 users is not supported.

We need to achieve more whether it is planning daily menus planning coordinating family plans or a virtual tutoring session.. Microsoft decides the features put into Exchange Online Skype for Business Server 2015 and this SFB mobile app there is no reason that they cant make it work.. I looked it up in the Skype app under calendar and if you click on the Join button it works but if you mistakenly see the link in the body of the calendar then you still get the browser.. Microsoft decides the features specified in Exchange Online Skype for Business Server 2015 and this Mobile APP SFB Theres no reason why they cant get it to work.. We need to get more done whether its planning daily menus scheduling appointments coordinating family schedules or having a virtual tutoring session.
